I strongly urge the FCC to reject the NAB's petition 04-160. I live in a rural area and the only way I can get reliable radio and television service is via satellite. I do not understand why the NAB seeks to stop XM from providing XM Instant Traffic & Weather. It is a great service and as far as I can tell does not adversely impact the NAB's services. It sounds to me that the NAB is once again trying to block any new entities that offer it competition. Let's do the smart thing and defeat this petition!
